

Cris Niell

Associate Professor, Department of Biology at University of Oregon

Eugene, OR, US

Expert in neuroscience, interested in understanding how the brain interprets sensory information and drives our actions.

Description

Cris Niell is an expert in neuroscience, interested in understanding how the brain interprets sensory information and drives our actions. At the University of Oregon, he is an assistant professor of biology and a member of the UO's institute of Neuroscience. His lab has developed methods to study the activity of neurons and brain regions during perception and cognition, with applications that range from childhood development and education to understanding autism and schizophrenia.

Industry Expertise

Education/Learning

Topics

Function and development of neural circuits for visual processing
