David Keellings

Assistant Professor at University of Florida

Gainesville, FL, US

David Keellings focuses on climate extremes, driving physical mechanisms, and the influence of climate change versus natural variability.

Biography

David is a faculty in the Department of Geography and is affiliated with the School of Natural Resources and Environment, the Florida Climate Institute, and the UF Water Institute. His research focuses on understanding climate extremes like heat waves and drought. David enjoys working in interdisciplinary teams and his strengths lie in utilizing innovative methods including machine learning and extreme value theory to improve our understanding of climate extremes and better prepare society for their impacts. David teaches classes on climate change, statistical analysis, programming, and AI/ML.

Areas of Expertise

AI, Drought, Climate Extremes, Heat Waves, Rainfall
