

Emma Bartfay, PhD

Associate Professor, Faculty of Health Sciences at University of Ontario Institute of Technology
Oshawa, ON, CA

Award-winning researcher advancing dementia diagnosis and treatment options, and reducing caregiver burden

A globally aging population has positioned dementia to become the world's leading cause of disability and dependency among older adults, bringing physical, psychological, social and economic challenges for families. Emma Bartfay, PhD, has devoted her much of her research to stemming the effects of dementia on individuals living with the conditions and their caregivers. An Associate Professor in the Faculty of Health Sciences at UOIT since 2005, Dr. Bartfay's teaching and research has been guided toward this specialty.

Dr. Bartfay completed her Bachelor of Science at Brandon University in Brandon, Manitoba in 1990, and in 1994, she earned her Master of Science from the University of Waterloo in Waterloo, Ontario. As a graduate student she developed a love of research and was inspired by many professors who mentored her. She credits her role as a teaching assistant with fuelling her interest in teaching and mentoring others. In 1998, she completed her Doctorate in Epidemiology at the University of Western Ontario in London, Ontario, and followed her passion for teaching and research to pursue a career in academia where she could engage in both avenues.

In 1999, Dr. Bartfay began her career as a scientist in the Cancer Research Institute in the Division of Cancer Research and Epidemiology, and an assistant professor in the Department of Oncology, both at Queen's University in Kingston, Ontario. In 2000, she became an assistant professor in the Department of Community Health and Epidemiology at Queen's. Then in 2003, she was appointed assistant professor in the Department of Psychology at the University of Windsor, in Windsor, Ontario.

Dr. Bartfay's noted research has garnered many additional awards from the Canadian Institutes of Health Research, the Canadian Health Services Research Foundation, the Natural Sciences and Engineering Research Council of Canada, and National Cancer Institute of Canada. She is a member of the International Epidemiological Association and the Canadian Society of International Health.

University of Waterloo

MSc Science

Brandon University

BSc Science

Technical Committee, Annual Global Healthcare Conference

For two years, Dr. Bartfay has been a member of the conference's technical committee. The 2018 conference theme focuses on the differences in health care across societies, and how government, private sector and public health collaboration is needed to ensure its accessibility and affordability for everyone. It also examines the role of health researchers and developers in advancing health care and medical science.

Editorial Board, Journal of Community Medicine and Health Care

This is an open access, peer reviewed, scholarly journal dedicated to publish articles covering all community medicine and health care. The journal aims to promote research communications and provide a forum for doctors, researchers, physicians and healthcare professionals to find most recent advances in all areas of community medicine.

Associate Professor, Faculty of Health Sciences, UOIT

Dr. Bartfay received the 2013 Faculty of Health Sciences nominee, UOIT Teaching Excellence Award (Core Faculty), and has taught undergraduate and graduate courses in areas of Global Health, Issues in Health Care, and Epidemiology. She serves on numerous internal committees including UOIT's Community Health Working Group.

Ontario Ministry of Health and Long-Term Care Career Scientist Award in Health Services Research

Receiving this prestigious award early in her career enabled her to conduct groundbreaking research to advance the body of knowledge related to public health practice and policy.
