He became interested in forgiveness through his practice in couple counseling, and he began conducting research on forgiveness in 1990 but writing about its clinical uses in the 1980s. In the last 30 years, he has studied forgiveness, justice, faith, and a variety of virtues under the general rubric of positive psychology. He became interested in their relationship after his mother's murder and brother's subsequent suicide.

He has studied a variety of topics relevant to positive psychology, the branch of psychology dealing with virtue for self and other. These include forgiveness, humility, gratitude, mercy, inspiration, marriage enrichment, altruism, love, and religion and spirituality. Recently he has studied and written most about forgiveness and humility. (Yes, he studies other people!)
