

# **Honglei Chen**

**Professor of Epidemiology and Biostatistics at Michigan State University**

East Lansing, MI, US

Research focuses on disease prevention and causes of Parkinson's disease.

---

## **Biography**

Honglei Chen is a professor in the Department of Epidemiology and Biostatistics at Michigan State University. His research focuses on neurodegenerative diseases, especially Parkinson's disease. He works on several large prospective cohorts to determine the environmental and genetic causes of Parkinson's disease and characterize high-risk populations through research on initial symptoms and biomarkers. The ultimate goal of his work is disease prevention and more effective clinical management.

---

## **Industry Expertise**

Health and Wellness, Education/Learning, Research, Writing and Editing

---

## **Areas of Expertise**

Biomarkers, Parkinson Disease, Epidemiology, Biostatistics, Prodromal Symptoms

---

## **Education**

**Tufts University**

PhD Nutritional Epidemiology

**TianJin Medical University**

MD (equivalent) Preventive Medicine

**Chinese Academy of Preventive Medicine**

MA Preventive Medicine / Community Nutrition

---

## **Accomplishments**

**Tenured Senior Investigator appointment**

A Senior Investigator is a NIH employee who has been granted tenure by the Deputy Director for Intramural Research (DDIR), after review and recommendation by the NIH Central Tenure Committee (CTC) or the Senior Biomedical Research Service (SBRS) Policy Board. Tenure at the NIH is the commitment by an Institute or Center (IC) of independent resources to an independent Senior Investigator, including salary, operating budget, personnel, and space.
