

Irene Kan, PhD

Associate Professor of Psychological and Brain Sciences | College of Liberal Arts and Sciences at Villanova University

Villanova, PA, US

Irene Kan, PhD, investigates the neural bases of human memory and executive functions, as well as the effects of healthy aging on memory.

Biography

The study of the link between biology -- especially the brain -- and behavior is Dr. Kan's forte. Reporters working on stories about behavioral disorders arising from conditions such as Organic Amnesia, Traumatic Brain Injury, and a variety of neuropsychological disorders will find Dr. Kan a premier source. The effect of neural functioning on memory and language is her special area of emphasis.

Industry Expertise

Research, Education/Learning

Areas of Expertise
