

Jack Rochel

President at Epsilon Electronics Inc.

Montebello, CA, US

Jack Rochel has been the president of Epsilon Electronics for over a decade. His emphasis on innovation has helped Epsilon stay competitive.

Description

Jack Rochel has extensive experience in managing companies. When Jack was in business school, he was top of his class and dreamed about one day becoming president of a company. When Jack Rochel graduated from university, he started working at different manufacturing companies and quickly learned that innovation is key in order to stay competitive. He knows that once companies don't invest much in research and development, they are doomed to be killed by the competition.

Epsilon Electronics Inc., being a technology company, has to continuously be investing in research and development. Jack Rochel knows the key to his research and development team has to be in-house or else products will become sub-par to the ones they had from last year. This is due to the fact that the products will look generic and obvious it was not made in-house. Jack Rochel has other key strategies for innovation in his sleeve namely that of the influence it should have from countries like the United States and Korea.
