

Jim Galligan

Neuroscience Program Director and Professor of Pharmacology and Toxicology at Michigan State University

East Lansing, MI, US

Jim Galligan's current research focuses on the neural control of gastrointestinal motility and blood flow.

Description

James Galligan is a professor of pharmacology and toxicology, as well as the director of the Neuroscience Program at MSU. His research focuses on identifying the unique mechanisms of neurotransmission that allow the enteric nervous system to control gut function.

Galligan can speak on a number of topics related to prescription drugs and opioids and the effect these substances have on people.

Industry Expertise

Health Care - Facilities, Health Care - Services, Education/Learning, Health Care - Providers

Topics

Drug Discovery and Receptors, Neuroscience, Toxicology, Pharmacology

Affiliations

American Gastroenterological Association Research Policy Committee, American Neurogastroenterology and Motility Society

Education

University of Arizona

PhD Pharmacology and Toxicology

Rutgers University

MS Physiology

St. Michael's College

BA Biology and Psychology

Accomplishments

Michigan State University Distinguished Faculty Award 2011

Up to ten awards are granted annually to faculty members for outstanding total service to the University. These awards are typically granted to faculty who have demonstrated distinction in a combination of teaching, research and service/outreach activities. Over the years, the awards have gone to those senior faculty who are considered to be among the University's finest teachers and scholars.
