Juan Andrade Laborde
Associate Professor at University of Florida
Gainesville, FL, US
Juan Andrade Laborde develops sustainable strategies and technologies that can be used to deliver nutrition to vulnerable populations.

Biography
Juan Andrade Laborde is an associate professor of global nutrition in the Department of Food Science and Human Nutrition with a long-term goal to develop sustainable strategies and technologies that can be used to deliver adequate nutrition, especially micronutrients, to residents of low-income countries and thereby help to promote human health and economic development. Juan’s research is focused on agriculture and food and nutrition security programs, food fortification, low-cost, point-of-use diagnostic tools for assessment, quality of food aid products and experiential learning education programs. Juan's current research efforts are focused on the problem of protein and micronutrient malnutrition, development of better vehicles for food fortification and improvement of RUTF functionality.

Areas of Expertise
Food Aid, Micronutrients, International Development, Human Nutrition, Food Science and Technology, Food Fortification
