

Justin Velthoen

QStock Inventory Brand Manager at MSA Systems

Greater Los Angeles Area, , US

Supply Chain Management | Value Chain | Inventory Management | Warehouse Management Systems | Traceability

Biography

Managing the QStock Inventory brand allows me to help businesses experiencing growing pains integrate systems that will help them scale as quickly as their customers need them to.

As a Slot Coordinator and Warehouse Supervisor for one of the largest food distributors in the world, Sysco Food Services, I became acutely aware of the benefits of even the smallest changes in efficiency. Being responsible for the sheer volume of orders across over 90 pickers on a pick path half a mile long made each placement of item critical to labor and damage.

Working closely with the executive staff at Eldorado Stone, I helped roll out a Warehouse Management System across the country and became intimately involved in the unique financial concerns of a manufacturer. From when to determine Work In Process, scrap, and even scheduling to ensure the highest level of customer satisfaction at the lowest possible cost.

Probably the thing I love most is leaning on my 13 years of experience in Supply Chain and Sarbanes-Oxley compliance to create reports that turn years of data into meaningful information to influence critical business decisions.

Each business is unique and a welcome challenge. If your business feels like it needs a new body with each new account, definitely contact me to find out how you can use systems to become more efficient as you grow.
