This talk is a primer for executive level decision makers, where I share the best practices and the most important pitfalls to avoid when choosing to invest in (or move to) the cloud.

Testimonials

Wim Remes

Working with Kai for our yearly team-building event was everything we expected it to be. Not only is Kai an engaging person, his approach is designed to make the most out of the experience. He went to great lengths to personalize the event and made sure that every attendee got the most out of his sessions. Engaging a very diverse and demanding audience seems to come natural to Kai. I would recommend working with Kai to anybody who is looking for a professional, engaging, and client-oriented event.
