

Kathy Seifert

CEO at ESPS, LLC

Salisbury, MD, US

Dr. Seifert brings her unique research on the roots and prevention of violent crime and dynamic style to your discussion of today's top issue

Description

Dr. Kathryn Seifert, CEO of Eastern Shore Psychological Services, has worked for over 30 years in the areas of mental health, criminal justice, and addictions. Dr. Seifert has specialized in the assessment and treatment of individuals who are at risk for violence and who are emotionally disturbed, behaviorally disordered, victimized, delinquent, and/or attachment disordered. She has lectured nationally and provides training on the topics of "Assessing the Risk for Violence," "Attachment Disorders," and "Attachment Violence & Assessment." Her book, *How Children Become Violent*, was published in October 2006 and "Youth Violence" was published in 2012 by Springer Publishing. Dr. Seifert developed the CARE 2, a valid and reliable instrument designed to assess the risk for violence and to determine the appropriate level and type of services at risk youth require. She testifies as an expert witness, writes a blog for Psychology Today, and has appeared on CNN, Discovery ID, and Fox news radio.

Sample Talks

Fallen Angels: What Causes Children to Become Violent?

There are over 3 million cases of child maltreatment each year in the US. This means there are 3 million children who, because they didn't receive the love and nurturing that's vital at early stages of development, already have many of the risk factors that lead to acts of violence later on in life. This includes rape, murder, sex abuse, and suicide. What can you do as an educator, social worker, counselor, healthcare professional, or parent?

Testimonials

Richard Bearman

My agency has benefited from Dr Kathy's presentations on several prior occasions and on February 24, 2011, she presented a workshop on identifying potentially dangerous people and working with them so as to minimize or control the risk to oneself. We are happy to be able to work with Dr Kathy because she is original, knowledgeable, and enthusiastic and those qualities are conveyed in her presentation style. She has a well-honed ability to speak to a mixed crowd of experienced professionals and newer paraprofessionals without talking down to anyone or speaking over peoples' heads. We request evaluations from our workshop participants and Dr Kathy has always rated very high both in content and style. I am certain you will be pleased with her

Al Smith

Dr. Seifert and I have worked together on a couple projects over a number of months. She has wonderful insight in many areas of psychology. Indeed, CNN thought so highly of her that she was interviewed on Anderson Coopre\'s program regarding the Tuscon Shootings. Along the same lines, I had the pleasure of discussing the effects of mental and physical abuse on childrren and how that manifests itself on those people through adulthood. I would highly recommend Dr. Seifert professionally. And as I have come to know her through our work together, I kow that she is a caring person as well.
