

Ken Prehoda

Professor of Biochemistry, Biophysics & Molecular Biology at University of Oregon

Eugene, OR, US

Expert in molecular biology and molecular evolution.

Description

Ken Prehoda is an expert in molecular biology and molecular evolution. At the University of Oregon, he is a professor of chemistry and biochemistry. Ken studies how cells evolve over time and how cellular evolution can help find clues to diseases. He is particularly interested in how proteins work inside cells. Ken and his team identified an ancient mutation that contributed to evolution of multicellular animals.

Industry Expertise

Education/Learning

Topics

Biochemistry, Molecular Evolution, Molecular Biology
