

Mark Greenfield

Director of Web Services - University at Buffalo at ExpertFile

Buffalo/Niagara, New York Area, NY, US

Higher education web professional, consultant, keynote speaker, future, educational technologist

Biography

Mark Greenfield is a highly regarded, influential member of the higher education web community. He is an accomplished speaker who frequently presents at a wide range of higher education conferences and meetings where his thought provoking commentary on the impact of emerging technology on college campuses challenges audiences to rethink their basic assumptions about web communications.

Mark has worked at the University at Buffalo for 30 years. He has been a full time web professional for the past 19 years, currently serving as a Digital Strategist. He began his career at UB as a supervisor for Instructional Technology Services where he played a significant role in integrating technology into the classroom. Mark has also served as a visiting instructor in UB's former School of Informatics. His research interests include emerging technologies, the social web, the mobile web, the Millennial Generation and their use of technology, and the impact of globalization and technology on the academy.

Mark has been providing consulting services on all things web for 20 years to a wide variety of clients, primarily in higher education. He assists organizations in developing strategies that leverage the full potential of emerging web technologies. He is also the driving force behind the uwebd social network, a social network created for higher education web professionals to connect and collaborate; as well as strengthen relationships with peers across the globe.

Affiliations

HighEdWeb, Noel-Levitz, University at Buffalo

Sample Talks

Higher Education Gets Flattened

Higher Education is getting flattened. "Flattened" comes from Tom Friedman's book *The World is Flat* and is defined as, "when the impact of the Internet and globalization render an industry unrecognizable, and in many cases, obsolete." Globalization 3.0, the arrival of the technically adept Millennial Generation, and the ongoing Communications Revolution has created a perfect storm that will forever change the college campus.

It's the End of the Web as We Know It (And I Feel Fine!)

Examines the future direction of the web, the implications for higher education, and the new opportunities for communicating and providing services to all constituents.

Born to be Wired: Technology, Communication and the Millennial Generation
