If You Build It, Will They Come? Increasing Parent Participation

You have developed your workshop, copied handouts, and prepared your notes. How do you fill the seats? Although there is still a place for one way communication, we now have more powerful ways of recruiting participants. This workshop will give school counselors a recruitment model that goes beyond one-way communication.

Burnout Prevention - It's More Than Just Self Care

We have been looking at burnout prevention from the wrong perspective. Neglecting our self-care is just a symptom of other issues; it is not the cause of burnout. Focusing only on self-care will never get to the primary issue of burnout.

Neil will share his model of burnout prevention that has its roots in relationship theory. When we can begin to understand our job through the lens of a relationship, we then have the tools to reduce burnout.

Pam Brott

An important consideration for me as I envisioned the theme and aspirations for this event was a keynote speaker whom the audience knew and would relate to at an early morning hour. The initial evaluations of you as the keynote speaker reflect a very high rating. Neil, you certainly delivered!

Neil, I respect the work you are doing to provide professional development to professional counselors in a variety of settings. I have attended your sessions and find your presentation style engaging and informative.
