More Results...Less Drama: What Big Companies Can Learn from Startups

What can established companies learn from smaller, innovative firms about making innovation happen - faster, cheaper, better? In this workshop we look at how small startups take an idea, develop it, and ultimately create viable products and services that drive growth. The workshop provides examples of how startups use emerging systems such as lean startup, blue ocean strategy and customer value management and also includes case studies.

Marketing that Matters for Technology Entrepreneurs

Your big idea in a crowded market is worth nothing... until you figure out how to competitively differentiate your product and connect with a market that cares. This session will first focus on the unique marketing challenges faced by early stage technology companies. It will also provide attendees with proven and practical principles for visioning new products, breaking into a market and building a sustainable business venture.

Moving from Ideas to Income: Proven Ways to Rewire your Company for Success

In business today, ideas have become cheaper than ever. In fact, your big idea amidst a crowded market of competitors is worth nothing. That is, until you figure out how to competitively differentiate your product and connect with a market that cares. This session will explore how companies, both large and small can develop more powerful ways to innovate faster, cheaper and better. This session provides you with proven and practical principles for visioning and introducing new products.

Building Investor Presentations that Get Results

In this session we will cover many of the essentials of building and delivering an effective presentation that quickly builds credibility, keeps your audience engaged and creates the right dialogue with investors. Attendees will be guided through a simple yet effective system for creating an investor pitch that gets results. You will learn from actual examples of company presentations that have generated investments with angel and VC investors.

Testimonials

Jo Ann Dizy

"Peter's presentation on thought leadership was engaging and thought-provoking. He challenged all of us to re-evaluate our role as CEOs within our companies and to strongly consider the impact that this type of marketing can have on our businesses."
