

Prof. Peter Lloyd-Sherlock

Professor of Social Policy and International Development at University of East Anglia

Norwich, , GB

Peter Lloyd-Sherlock worked as the the External Research Coordinator for the UNRISD Project on Ageing, Development and Social Protection.

Biography

My main area of research looks at social protection, health and the wellbeing of older people in developing countries. I am also interested in the economic and social effects of non-communicable diseases, such as stroke, heart disease and Alzheimer's Disease. I have a more general interest in social policy, particularly in Latin America.

Contrary to popular belief, more older people live in the developing world than in the rich north. Despite this, the condition of older people and the wider effects of population ageing are still seen as peripheral concerns in development policy. I have been involved in studies of older people's wellbeing and vulnerability in Argentina, Brazil, South Africa and Thailand. I am currently involved in two funded research projects examining the wellbeing of older people and their families in eight different countries.

Industry Expertise

Research, Education/Learning

Areas of Expertise

Public Policy, Alzheimer's, Cardiovascular Diseases, Human Rights, Active Ageing

Education

London School of Economics

Ph.D. Areas Studies

London School of Economics

M.A. Areas Studies

St. Annes College, Oxford University
