

Rob Burbach

Research Manager, Survey and Analysis at International Data Corporation (IDC)

Toronto, ON, CA

Research Manager, specializing in surveys & analysis for the Canadian ICT sector

Description

Rob is a research manager in the Survey & Analysis group in IDC Canada. He designs, manages and analyses IDC Canada internal and custom research projects. The internal research projects focus on how consumers, top corporate executives, and business telecom decision makers adopt and use IT technologies in Canada. Custom research projects include qualitative and quantitative work across a wide variety of technology related topics.

In addition, Rob is a member of the global IDC Custom Solutions Buyer Behavior practice. In this role he designs, manages and analyses custom research projects for global technology firms. Research areas of expertise include branding, market modelling, pricing and new product research.

Rob's initial role at IDC was as the Canadian analyst for IDC Financial Insights. He maintains a strong interest in the financial services sector.

With over 25 years in the market research industry, Rob's expertise includes both qualitative and quantitative market research experience on the both the buyer and provider sides. He holds both an MBA and Bachelor of Mathematics degree.

Financial Services Consumers Are Evolving. Are You Ready?

Consumer communication needs are changing and your customer experience strategy should too. With evolving technology, it's no longer enough to segment customers based on age alone. You need to understand how Financial Services customers use technology and the impact it will have on their interaction with you.

Learn how the future consumer of financial services will impact your customer experience strategy, and discover an innovative approach to segmenting future consumers.
