

Ryan J. Watson, PhD.

**Assistant Professor of Human Development and Family Studies at University of Connecticut
Storrs, CT, US**

Watson's research focuses on vulnerable adolescents, with a focus on interpersonal relationships.

Description

Watson researches how social support provides a foundation for achievement and healthy outcomes for vulnerable youth. His work advances the scholarship of health and well-being, interpersonal relationships, and sexual minority youth through mixed-method approaches. He has used both population-based and non-probability data sets from the U.S., Norway, and Canada to examine how social support -- friends, teachers, and parents -- may attenuate the impact of risk factors such as victimization, homophobia, and stigma.

Topics

Social Support, LGBTQ Health, Sexual Health, HIV Prevention, Sexual/Gender Minority Youth and Young Adult Health, Family Acceptance and Rejection, LGBTQ teenagers, Homophobia

Accomplishments

Partnership with Human Rights Campaign (HRC)

Watson and researchers at the Human Rights Campaign (HRC) Foundation conducted the largest study of LGBTQ teens. More than 12,000 respondents, ranging in age from 13 to 17, and drawn from all 50 states and Washington, D.C., participated in the online 2017 survey.
