

Steven Rodin

President and CEO at Storagepipe

Toronto, ON, CA

Technology entrepreneur with extensive start-up experience. Learn from real-life trials and tribulations of a software exec.

Steven Rodin serves as Storagepipe's President and CEO where he is responsible for planning the company's growth and determining its strategic direction. Additionally, Steven leads the company's sales and marketing initiatives as well as establishing strategic alliances with valued-added partners and resellers.

An energetic, entrepreneurial and driven visionary with extensive business and technology experience, Steven has over 10 years experience in leading and managing high performing teams, sales and marketing, creating innovative technical solutions, deal execution and professional services.

Prior to joining Storagepipe, Mr. Rodin served as an Executive Director with Comverse Technologies where he lead the company's self-service and customer relationship management initiatives and established strategic alliances with multi-national systems integration, technology services and infrastructure partners.

Steven was the President and Co-founder of Toronto-based Davinci Technologies Inc., which was acquired by CSG Systems in 2003 and subsequently sold along with a large division to Comverse Technologies in 2005. While President of Davinci, Mr. Rodin assembled an exceptional team, begun a successful expansion strategy to Europe and succeeded by applying innovative technologies to solve business problems for many world-class customers. Steven lead the sale of Davinci Technologies to CSG and was instrumental in its integration and success within the Kenan Billing Systems division of Comverse.

Prior to co-founding Davinci in 1996 and subsequently joining CSG, Mr. Rodin served as Senior Technology Consultant at Accenture in the Communications Industry Group. During his tenure at Accenture, Mr. Rodin played important roles in defining, developing and implementing real-time message processing, customer care and billing systems.

Mr. Rodin graduated with a Honors Business Administration (HBA) degree from the University of Western Ontario.

Bringing the Cloud Down to Earth: Backup, Recovery and Online Storage

Automating backups to the cloud can eliminate much of the manual processes associated with IT management, without having to make any capital investments. This leads to a considerable cost savings and allows companies to free up IT time for more important projects. Also, storing data in the cloud greatly simplifies management of rapid data storage growth. Join Steven as he reviews the ongoing technical innovations that make storage in the cloud easy and affordable for companies & organizations.

At Your Fingertips: Retrieving & Storing Archived Data

As worldwide online bandwidth, processing capability, and the number of internet-enabled devices continues to grow on an exponential curve, all of these factors combine to increase the amount of corporate data that we're producing at an even faster rate. There are many ways that data archiving can help you overcome the challenges of exponential data growth. This workshop will review how data archiving can help create a cost-effective and streamlined data protection and retention strategy.

University of Western Ontario

Business Administration (Honours)
