

Software Developer

We're looking for senior developers to cover the full software development life cycle from architecture to implementation. Working beyond code, you will collaborate closely with range of disciplines including technical product managers, designers and QA. As a member of our development team you will be super excited to see how quickly your ideas and perspectives can move from vision to reality. As an agile environment building on leading edge standards and software frameworks we are proud of the position we've helped our company achieve as a market leader.

Education

- Computer Science or related engineering degree or equivalent experience

Technical Requirements

- Experience with an SPA JS framework
(Any of Ember, Angular, React or Backbone is great).
- Knowledge of front-end built tools such as Grunt and Gulp
- We strive for a high-level of code quality. Karma and Mocha help us with this.
- Server-side programming skills are definitely an asset. We use Node.js and PHP.
- Familiarity with CI tools like Jenkins, AWS deploy and AWS code pipeline

New graduates are welcome. ExpertFile is an equal opportunity employer.
